Electrical Comprehension Assessment

Electrical Comprehension - designed to assess a person's understanding of electrical principles of circuits, volt, amperes and resistance. This assessment is ideal for confirming a person's electrical comprehension and reasoning prior to employment and or training.

The Assessment

Assessment Guide - The Guide is in an easy-to-use format containing full instructions on how to administer the assessment.

Examples - Contained in the question booklet for the person to work through before taking the assessment.

The Assessment - Consists of 24 multiple-choice questions with a maximum duration of 20 minutes covering all aspects of electrical comprehension. The question booklets are supplied in an easy-to-read format making full use of colour graphics and modern assessment methods.

Marking - The marking grid is placed directly over the answer sheet and scores are recorded onto a pre-printed profile sheet.

Grading - A Profile Sheet containing detailed Outcome Statements and recommendations makes the assessment easy to grade.

The assessment is available in the following formats:

Paper Based - Included in the purchase price:

Assessment Administrator's Guide
5 Candidate Question Booklets containing examples and questions
50 Candidate Answer Sheets
Marking Grid and Profile Sheet

Internet Based - Hosted by Selectahead

This application gives organisations flexibility as to where and when assessments are conducted. Time based licensing agreement allowing any number of applicants to be assessed at no extra cost.

Essentially this assessment is:

EASY to use, **EASY** to read and **EASY** to mark
