

**Engineering Technician Initial Assessment** is a selection and recruitment tool for applicants seeking a career in Engineering. It seeks to confirm an applicant's ability to undertake a **Technician Apprenticeship** or **HNC/Foundation Degree**. It not only identifies strengths and weaknesses in Literacy, Numeracy and Problem Solving but **also** examines vocational aptitude towards this career.

### Can your applicant?

- Understand basic mechanical principles of motion, direction and applied forces in an engineering context
- Visualise two and three dimensional shapes
- Understand principles of measurement and angles
- Understand electrical principles
- Understand and solve problems
- And has the necessary skills to achieve an advanced Further Education Programme

**Confirm you are putting your applicant on the RIGHT course**

### Our System provides you with –

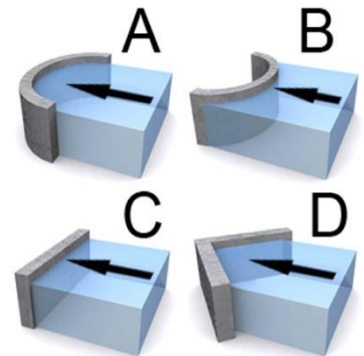

- 64 multi-choice questions
- Marked results immediately available
- Question by question breakdown
- Scores graded with career recommendations
- Individual results can be printed or saved
- Easy to provide consistent feedback
- A report which can be print/saved or sent directly to an employer
- Easy to retrieve audit trail
- Secure password entry
- Conduct assessments anywhere with internet access

**The software does all the work for you!!**

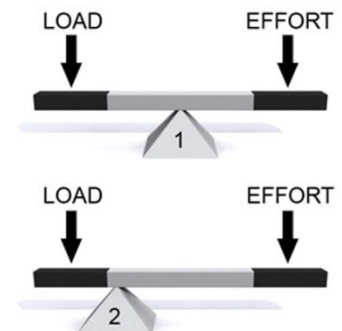

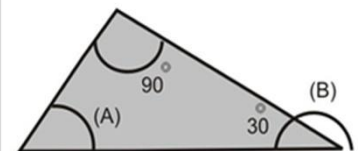

**Assess Engineering Technician Initial Assessment – FREE**  
**Our Online demonstration will enable you to evaluate the complete assessment**
